

PRODUCT / SERVICE SHEET 9

## EQUIPMENT CAPABILITIES

American Tank Company owns and operates a manufacturing facility in Scottsville, TX. This facility produces API walkway/stairway material and components for bolted, welded, and fiberglass tank applications. East Texas has the largest concentration of shop welded tank fabricators in the USA. ATC can provide competitive prices, on time delivery, and quality products that meet API standards. This facility is equipped with machines prepared to handle medium and heavy fabrication. It is under expansion and will soon incorporate an API 12-B bolted tank line.
